How to Read the Updated Degree Audit

This is the degree audit

At the top, you find important information like the major, catalog year, and expected graduation date.

Below the audit header, a note that indicates if the student has fulfilled the degree requirements or not.

The body of the audit contains all the requirements for the major, NUPath, university requirements, minors, concentrations, and transfer credit information. Every audit looks a little different depending on the student’s major selection and potential concentration, minor, and transfer credit.
Open each of the sections by clicking on the > next to the requirement to view the program. Requirements with a green check box are complete. Requirements with a red X are incomplete. Requirements with blue ellipses are complete with in progress courses.

Looking at each requirement, the courses that fulfill the requirement are in each section. Courses on the course list are courses needed to fulfill the section. Sometimes, there will be a course range instead of a given course (ex. JEDI1000-JEDI2999). Courses on the NOT FROM list cannot fulfill the requirement.

University requirements are at the bottom of the audit.
